## SUMMARY

Full-Stack web developer, providing unique solutions to create fast, responsive, and customer-first web applications. My experience, including roles requiring strong customer interaction and clear communication, has honed my ability to understand needs and provide an effective solution to problems. I am a creative problem-solver with a passion for incorporating diverse perspectives into my work. I excel in collaborative environments and continuously seek opportunities to learn and apply new ideas and skills. I am committed to delivering high-quality results and continuous improvement. In addition to my technical expertise, I am highly coachable and eager to embrace new ideas and technologies.

## TECHNICAL SKILLS

JavaScript ES6+, CSS3, HTML5, SQL, NoSQL, GitHub, MongoDB, MySQL, Express, React, Node, Handlebars, jQuery, Bootstrap, API, Framer, Framer, Microsoft Word, Microsoft Excel, Google Docs

## PROJECTS

**Active Eats!** | <https://github.com/JaysonNunez1/active-eats> |  
<https://jaysonnunez1.github.io/React-portfolio/>

- Summary: This application is intended for users who have been struggling with finding a diet to complement their workout exercises. Users will have the ability to keep track of their calories and calories per serving as well as a quick exercise that can help you burn the amount of calories the user has just consumed.
- Role: Jayson Nunez(frontend/styling) i contributed to the styling and layout of the content,as well as the linear gradient theme that is being used in the background, Tamer Bekir(frontend/styling), Rafa rizvi (javascript/functionality)
- Tools: HTML, CSS, JavaScript, API.

**WeatherApp** | <https://github.com/JaysonNunez1/Jaysons-Weather-Dashboard-1> |  
<https://jaysonnunez1.github.io/React-portfolio/>

- Summary:With a user friendly interface users will be able to search for any city and be presented with the current and future weather conditions for that city.Users will also be able to see an icon representing the weather condition in a 5 day forecast format.Using the

Openweather api the current and future weather data will be fetch and returned back where the user will see the data dynamically on the page.

- Role: Sole author
- Tools: HTML, CSS, JavaScript, jQuery, API, Bootstrap.

**Password Generator** | <https://github.com/JaysonNunez1/Jaysons-Password-Generator> | <https://jaysonnunez1.github.io/React-portfolio/>

- Summary: This application enables users to generate random passwords based on criteria that they've selected. This app has dynamically updated HTML and CSS powered by JavaScript. The application prompts the user to choose a password length and character types, then generates a password based on their selections. The generated password is displayed in the password input field.
- Role: Sole Author
- Tools: JavaScript, CSS, HTML.

## PROFESSIONAL EXPERIENCE

### 311 Call Center Representative

OTI, Office Of Technology & Innovation

2025-Present

- Manage high-volume citizen inquiries by logging, categorizing, and routing service requests and complaints via the city's CRM system.
- Apply diagnostic problem-solving techniques to identify the root causes of caller issues and deliver accurate, real-time solutions to callers.
- Utilize effective communication and de-escalation strategies to handle complex customer interactions, ensuring positive engagement and clear information delivery.

### Security

Hirshleifers, Americana Mall

2023-2025

Manhasset, NY

Implemented continuous improvement initiatives, such as automation of security monitoring and response procedures, demonstrating a proactive approach to problem-solving in enhancing security.

- Leveraged CCTV software to enhance monitoring capabilities, employing software engineering principles to optimize camera placement algorithms and improve real-time alert systems.
- Daily CCTV software maintenance ensuring that the system is up to date and functional
- Engaged in proactive risk management by evaluating security procedures, identifying vulnerabilities, and recommending necessary adjustments.

### Global Operations

Security agent

2021-2023

New York, NY

- Developed proactive strategies to mitigate vulnerabilities in software systems, applying problem-solving techniques to anticipate and prevent potential security breaches.

- Conducted comprehensive risk assessments to identify potential threats and vulnerabilities, employing critical thinking to prioritize risks and recommend mitigation measures.
- Worked in a cross-functional team in rapidly resolving security incidents by applying analytical thinking and troubleshooting skills to identify root causes and implement effective solutions.
